### **DETAILED ACTION**

In response to the Request for Continued Examination (RCE) under 37 CFR 1.114 filed on 11/14/09. Following the RCE, Amendments were filed on 5/14/2010, where claims 1, 10-11, 33, 41, 49, 51, 53, and 55 have been amended. Claims 1, 10-11, 15-17, 20, 23-24, 29, 33, 36, 39, 41, 43, 46, 48-56 are pending in the current application.

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Claims 1, 10-11, 15-17, 41, 43, 46, 49-50, and 55-56 are canceled without prejudice.

Authorization for this examiner's amendment was given in a telephone interview with David N. Caracappa (Reg. No. 43,532) on June 29, 2010.

### ***Allowable Subject Matter***

3. Claims 20, 23-24, 29, 33, 36, 39, 48, and 51-54 are allowed.

4. The following is an examiner's statement of reasons for allowance:

5. Claims 20, 23-24, 29, 33, 36, 39, 48, and 51-54 are directed towards a gaming method and device that is adapted to present a game of chance to a player and receiving a player input device for selecting a credit value and playing the game wherein the credit value is less than a smallest denomination for standard currency. Therefore the instant invention provides for wager amounts to be fractional amounts of standard currency (ie: 1 credit = \$0.007). Additionally, the instant claims provide for determining a number of credits available for wagering based upon

both the funds received from the player and the credit value selected by the player, displaying the credits on the gaming device to the player, receiving a player's wager, wherein the player's wager comprises one or more credits, and the player's wager does not have a total value equal to a standard currency denomination.

6. The closest prior art of Wilms teaches providing a game machine that can accept a predetermined denomination of standard currency that can be changed by the player to play a game of chance. Additionally, Wilms teaches a playable amount of credits as well as a machine that is able to display a player's reserve amount. However, Wilms does not fairly teach or suggest a gaming method that provides fractional amounts of standard currency to be used nor the ability for a credit value to be a fraction of \$0.01.

7. In another related gaming patent, Walker teaches the ability for a player to select the value that may be played by a user using a numerical keypad to enter their desired amount. However, Walker is also limited to only standard amounts of currency. Walker and Wilms do not fairly teach the applicant's desired invention of providing credits to a player to be wagered on where the amount is a fractional amount of standard currency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
